DETAILED ACTION

Reasons for Allowance

1. Claims 15- 28 are allowed.
2. The Drawings filed on 03/24/05 are accepted by Examiner.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 15-19, and 27-28, the prior art fails to disclose or render obvious the claimed combination including calculating a pressure difference by subtracting the pressure in the intake manifold from the pressure upstream from the throttle valve; comparing the pressure difference to at least one of: a first threshold value during throttleless operation of the internal combustion engine; and a second threshold value during one of throttled and unthrottled operation of the internal combustion engine; and determining that at least one of the intake-manifold pressure sensor and the ambient-pressure sensor is defective, if at least one of: the pressure difference is greater than the first threshold value; and the pressure difference is less than the second threshold value.

Regarding claims 20-26, the prior art fails to disclose or render obvious the claimed combination including an intake-manifold pressure sensor for providing an intake-manifold pressure signal that represents the pressure in an intake manifold of the internal combustion engine; an ambient-pressure sensor for providing a throttle-valve pressure signal that represents the pressure upstream from a throttle valve; a first operating state detector for providing a first status signal that represents a throttleless operating state of the internal combustion engine; and a first logic module for determining whether at least one of the intake-manifold pressure sensor and the ambient-pressure sensor is defective, by logically combining the intake-manifold pressure signal, the throttle-valve pressure signal, and the first status signal.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of U.S. Patent are not provided pursuant to MPEP 1302.12.
